It is understood that if damage to the property should result from broken pipes, leaky plumbing, open faucets, or other malfunctions of appliances/equipment when service is connected it is the sole responsibility of the applicant/property owner, and Smackover Municipal Waterworks is not any way liable.

I understand when I the applicant/property owner install a check valve this is a closed system, and it is the property owner/plumbers are required to install a thermo expansion device.

All new customers fall under Arkansas Bill 1389 Act 769 passed by the Arkansas Legislature in March 2003.
